Re: Bonding Program Reference
Louisiana Controls, Inc.

Dear George:

The Ohio Casualty Insurance Company provides contract bonds on behalf of Louisiana Controls, Inc., since 2009. We have found Louisiana Controls, Inc. to be an outstanding firm, with a good reputation in the contracting industry. We highly recommend Louisiana Controls, Inc. and would consider any project submitted by them to us for bonding. They are a well experienced company with a strong financial position and an excellent reputation.

We would entertain bonds on their behalf in the \$2,000,000 range with an aggregate program in the \$4,000,000 range. We underwrite each job on its own merits. A decision on any particular bond would, of course, be a matter between the contractor and ourselves and would depend upon favorable review of all of the underwriting factors pertinent to the project in question.

The Ohio Casualty Insurance Company is currently rated, A by A.M. Best rating in their most recent report. Our bond capacity is \$95,052,000 in the latest Federal Trade Register. The Ohio Casualty Insurance company is licensed to do business in all 50 States.

The Ohio Casualty Insurance Company

Marc D. Davis
